

MASTER SERVICES AGREEMENT

Enterprise Cloud Hosting Agreement

Contractual arrangement reference: CA-2026-004417

Effective date: 1 March 2024

Financial Entity: Meridian Payments DAC (LEI 5493001234ABCDEF5678)

Provider: NimbusGrid Cloud Services B.V. (LEI 7245009876XYZWAB1234)

1. Parties and Nature of Arrangement

This Master Services Agreement (the "Agreement") is entered into as of 1 March 2024 (the "Effective Date") between: (1) Meridian Payments DAC, a payment institution authorised and regulated in Ireland, with Legal Entity Identifier (LEI) 5493001234ABCDEF5678 (the "Financial Entity"); and (2) NimbusGrid Cloud Services B.V., a private limited company incorporated under the laws of the Netherlands, with Legal Entity Identifier (LEI) 7245009876XYZWAB1234 and Dutch Chamber of Commerce (KVK) registration number 74123456 (the "Provider").

This arrangement is designated internally under contractual arrangement reference number CA-2026-004417 and constitutes a standalone arrangement, not forming part of any overarching or master framework agreement between the parties.

NimbusGrid Cloud Services B.V. is a wholly-owned subsidiary of NimbusGrid Holdings N.V., its ultimate parent undertaking, identified by Legal Entity Identifier (LEI) 72450000000PARENT001.

This Agreement, and any dispute arising out of or in connection with it, is governed by the laws of Ireland, and the courts of Ireland shall have exclusive jurisdiction.

2. Scope of Services and Function Supported

The Provider shall supply Infrastructure-as-a-Service (IaaS) cloud hosting and data processing services (the "Services") supporting the Financial Entity's core payment processing platform, internally identified by function identifier FN-CORE-PAYSYS-01 ("Core Payment Processing Platform").

The function supported by the Services is the execution of payment transactions, a licensed payment service activity carried out by the Financial Entity (LEI 5493001234ABCDEF5678) under its payment institution authorisation.

3. Term, Renewal and Termination

This Agreement shall commence on 1 March 2024 and, unless terminated earlier in accordance with this Section, shall continue until 28 February 2027 (the "Initial Term").

The Financial Entity may terminate this Agreement for convenience by providing not less than ninety (90) days' written notice to the Provider. The Provider may terminate this Agreement for convenience by providing not less than one hundred and eighty (180) days' written notice to the Financial Entity.

Absent early termination for cause, this Agreement shall expire at the end of the Initial Term and shall not automatically renew -- termination not for cause: the arrangement will have expired and not been renewed.

4. Fees

In consideration of the Services, the Financial Entity shall pay the Provider an aggregate annual fee of EUR 480,000 (four hundred and eighty thousand euro) per annum, payable quarterly in arrears, in the currency of the European Union (EUR). The Provider's total annual expense attributable to this arrangement, reported in the same currency, is likewise EUR 480,000.

5. Data Processing, Storage and Location

The Provider stores personal and transactional data belonging to the Financial Entity as part of the Services. Data at rest is stored exclusively within data centres located in Ireland (IE). Management and processing operations relating to that data, and the Services generally, are provided from and carried out by the Provider's operations centre in the Netherlands (NL).

The data processed under this Agreement is classified as of High sensitivity, given its inclusion of payment transaction records and customer financial data.

The Financial Entity's core payment processing function has a Full reliance on the Services provided under this Agreement -- no alternative in-house or third-party capability currently exists to perform this function independently.

6. Sub-Processing and ICT Service Supply Chain

The Provider engages HyperScale Data Centres Ireland Ltd (Irish Companies Registration Office number IE-556677) as a second-rank sub-processor within the ICT service supply chain, to provide the underlying Infrastructure-as-a-Service (IaaS) physical data-centre capacity supporting the Services described in Section 2 above.

HyperScale Data Centres Ireland Ltd is identified for the purposes of this arrangement by its Company Registration Number (CRN) IE-556677. Within the supply chain, the Provider (NimbusGrid Cloud Services B.V., LEI 7245009876XYZWAB1234) is the first-ranked, direct counterparty to the Financial Entity, and HyperScale Data Centres Ireland Ltd is ranked second.

7. Business Continuity, Resilience and Criticality Assessment

The Financial Entity has assessed the function supported by this Agreement (Core Payment Processing Platform, function identifier FN-CORE-PAYSYS-01) as critical or important. This assessment was last performed on 15 January 2026.

The function was assessed as critical because a disruption to the Services would directly prevent the Financial Entity from executing customer payment transactions -- a core regulated activity -- with immediate operational, financial and reputational consequences.

The agreed Recovery Time Objective (RTO) for the function is 4 hours, and the agreed Recovery Point Objective (RPO) is 1 hour. The impact of discontinuing the Services, whether through Provider failure or contract termination without an adequately tested transition, is assessed as High.

8. Audit Rights, Substitutability and Exit Strategy

The Financial Entity, or an appointed third party on its behalf, may audit the Provider's premises, systems and records relevant to the Services, subject to reasonable notice. The most recent such audit of the Provider was completed on 10 November 2025.

The substitutability of the Provider is assessed as Highly complex substitutability, owing to a lack of directly comparable alternative providers offering equivalent Infrastructure-as-a-Service capacity at the scale required, combined with the material difficulty and lead time involved in migrating or reintegrating the Core Payment Processing Platform to an alternative provider or in-house solution. The reason recorded for this assessment is lack of real alternatives and difficulties in migrating or reintegrating, per the Financial Entity's most recent review.

An exit plan for this arrangement exists and has been documented and tested by the Financial Entity. Reintegration of the Services, whether to an alternative provider or in-house, is assessed as Difficult, given the technical complexity of the platform and the sensitivity of the data involved.

The Financial Entity has identified at least one alternative ICT third-party service provider capable of supplying a broadly equivalent service, namely CloudBastion Infrastructure Services Ltd, should a transition become necessary.

9. Signatures

The parties have executed this Agreement as of the Effective Date.

For and on behalf of Meridian Payments DAC:

Aoife Byrne, Chief Operating Officer -- 28 February 2024

For and on behalf of NimbusGrid Cloud Services B.V.:

Willem de Groot, VP Enterprise Contracts -- 28 February 2024
